UNDERSTANDING EPDs AND THEIR ROLE IN BREEAM ASSESSMENTS

ONE HOUR

COURSE OUTLINE AND DETAILS

 1 hour (1 CPD Point & Certificate received within 28 days of the course)

 Microsoft Teams or In-Person

What is the Aim?

To provide an understanding of Environmental Product Declarations (EPDs), including what they are, how they are developed, and how to interpret their key metrics. It outlines the standards and guidance that underpin EPDs and highlights important considerations when completing them.

The session also introduces BREEAM and its role in assessing environmental performance, demonstrating how EPDs contribute to achieving credits. A worked example is used to explain BREEAM ratings, category weightings, and credit allocation in practice.

Who Is This Course Aimed at?

This CPD is relevant to professionals in the construction and sustainability sectors including:

- Architects
- Engineers
- Sustainability consultants

It is also useful for the following who are involved in material selection, environmental assessments, or delivering BREEAM-certified projects.

- Contractors
- Manufacturers
- Project managers UK.

Course Content

- Understand What EPDs are and what the different EPD metrics are and mean
- Understand what standards and guidance are applied to EPDs
- Understand the process of EPDs and what you should be looking out for when completing one
- Understand what BREEAM is and what a BREEAM Assessment is and how they play a vital role in EPDs
- Understand the BREEAM rating benchmarks, category weighting, and credits through a worked example
